

Adrian Hernandez

Anaheim, CA 92804 | esnecpe356@gmail.com | LinkedIn.com/in/adrianpaulhernandez/ | 714-818-7782

SKILLS

Technical Skills (Programming Languages): Python, Java, C++, C#, R, MATLAB, JavaScript, SQL, HTML, CSS, x86 Assembly, Next.js, React, Svelte.

Software: PyTorch, Pycharm, OpenCV, VScode, Qt Creator, SQLite, RStudio, Microsoft 365, PASCO Capstone, Jupyter Notebook, MySQL Workbench, Microsoft Azure, OpenAI API, Linux, Git, Xcode, AWS, Claude, Wireshark, Figma.

Soft Skills: Leadership, Customer Service & Relationship Management, Communication, Time Management & Multitasking, Problem Solving, Teamwork, Adaptability, Public speaking.

Languages: Fluent in Spanish & English.

EDUCATION

California State University, Fullerton

Bachelor of Science in Computer Science

Fullerton, CA

Expected May 2027

Major in Computer Science; Minors in Cybersecurity and Mathematics.

Relevant Coursework: R & RStudio programming, Statistics Applied to Natural Science, Mathematical Structure (1 & 2),

Cybersecurity, Algorithm Engineering, Software Engineering, Operating System Concepts, Computer Organization & Assembly Language, Computer Communications, Artificial Intelligence, Compilers and Languages.

Cypress College

Cypress, CA

Aug 2019 - May 2024

Relevant Coursework: Data Structures, Python programming, Java programming, Intro to C++, C# programming.

PROJECTS

Hash Cracker (~20+hours)

Aug 2024 – Aug 2024

Python | Cryptography | Cybersecurity | Linux

- Built a password hash cracking tool supporting dictionary-based and brute-force attacks against MD5, SHA-1, and SHA-256.
- Built for Linux command-line use, deepening understanding of secure password storage and defensive security practices.

Library++ (~60+hours)

Oct 2025 – Dec 2025

C++ | Qt Creator | SQLite | Object-Oriented Design

- Designed and developed a desktop library management application using C++ and Qt Creator with a SQLite backend.
- Implemented core features including book search, detailed book views, and dynamic UI components using object-oriented design.

End-to-End Machine Learning Project (~80+hours)

July 2025 – Dec 2025

Python | Pandas | NumPy | Scikit-Learn | Azure Machine Learning

- Designed and implemented a complete machine learning pipeline covering data ingestion, preprocessing, model training, and evaluation.
- Performed data cleaning, feature engineering, and exploratory data analysis (EDA) to improve model performance.
- Integrated experiments with Azure Machine Learning to track results and support reproducibility, with modular, well-documented code for future enhancements.

PicoBoot GCN Loader — GameCube Bootloader (~20+hours)

Nov 2024 – Dec 2024

C | Python | CMake | Shell | Embedded Systems | Hardware Security

- Developed C-based low-level code for timing-sensitive hardware interfacing to inject and execute custom code during boot, automating build/flashing workflows with Python, shell scripts, and CMake while analyzing firmware trust assumptions in legacy console security.

WORK EXPERIENCE

Walmart

Westminster, CA

Sales Associate/Stocker Associate / Electronic Associate / Cashier / Customer Service

Feb 2017 – Present

- Maintained reliable attendance and strong performance across 8+ years in a fast-paced retail environment while balancing full-time coursework.
- Resolved customer issues under pressure while training new associates on POS systems.

El Pollo Loco

Anaheim, CA

Cashier / Food Handler / Food prepping / Customer Service

July 2018 – March 2019

- Handled time-sensitive tasks in a high-volume environment while following safety and quality procedures.

ACTIVITIES

EOPS & PUENTE PROGRAM — Member

Cypress, CA | Aug 2019 – May 2024

- Supported academic planning as an EOPS member and mentored Spanish-speaking students through the Puente Program.
